The question revolves around society's readiness to invest in sustainability and discuss it comfortably. However, the current challenge lies in our divergence from the intended path. CEOs recognize the necessity of sustainability, but understanding the real narrative is crucial. As a company, the primary step is to define sustainability objectives. But it's not a singular concept - it holds multifaceted dimensions. Effective leaders dismantle ESG (Environmental, Social, Governance) aspirations into manageable challenges for their teams." Sachin Kotak, Partner, Bain & Company at Times Now GSA ESG and Net Zero Summit 2023.
